THE WINTER OF ARTIFICE

BY

ANAÏS NIN

This is the third volume of the
Villa Seurat Series

Anaïs Nin is already well known for her "unprofessional study" of D. H. Lawrence and her *House of Incest*, both of which are now out of print. She has also written a Diary which runs to 55 volumes and of which an abridged version, of about 1,000 pages, will be published in the U. S. A.

To describe the subject of her new book is peculiarly difficult. Two of the themes in it have never before been handled in so resolutely modern and honest a manner: the relationship between father and daughter, and the confessions made directly by patient to psychoanalyst.

Anaïs Nin is perhaps the only living woman writer who tells the exact truth about woman's feelings and about her feelings towards man.

A memorable book, which will increase Anaïs Nin's already considerable and discriminating public.
